5-8컷 생성 프롬프트 (모델: Seedance 2.5)

Create a 10-second, 16:9 handmade clay stop-motion sequence consisting of exactly four shots: Shots 5, 6, 7, and 8.

REFERENCES
@Image1: Heady's character identity, proportions, face, glasses, hair, pencil, and clothing.
@Image2: Supi's character identity, proportions, face, glasses, hair, and clothing.
@Image3: The authoritative apartment environment reference. Preserve its room layout, floor materials, kitchen arrangement, furniture, and spatial relationships.
@Image4: The approved completed pasta structure. Preserve its exact silhouette, proportions, tiers, bracing, pasta arrangement, and cheese joints without redesigning it.
@Image5: Doorway continuity, including the existing door, character positions, screen direction, and daylight.
@Image6: Placement reference ONLY. It indicates that the structure stands directly on the floor in front of the stove. Do not copy its floor tiles, cabinetry, room design, lighting, or other environmental details.

REFERENCE PRIORITY
Use @Image3 for the entire apartment environment.
Use @Image4 for the structure's exact appearance.
Use @Image6 only to identify the intended floor location in front of the stove.
If environmental details conflict, @Image3 takes priority over @Image6.

PACING
Use natural performance timing rather than rigid per-shot timestamps.
Allow Supi's anger, interrupted reprimand, discovery, and quiet amazement to read clearly.
Use clean cuts between the four shots.

CORE CONTINUITY
Supi stands outside the apartment doorway.
Heady stands just inside, facing outward toward Supi.
The completed pasta structure stands behind Heady, deeper inside the apartment, directly on the floor in front of the stove.
It is made from rigid, uncooked golden pasta strands connected by small pale cream cheese pieces.

The structure is already complete and remains unchanged.
It never stands on a table, desk, counter, or kitchen island.
Preserve established daylight, character scale, and screen direction.
Do not reveal the cat during these four shots.

SHOT 5 - SUPI ARRIVES ANGRY

Camera:
A medium shot from inside the apartment, looking outward over Heady’s shoulder toward Supi in the doorway.
Heady’s rear shoulder forms a limited foreground frame.
Supi’s face is clearly visible.

Action:
Supi stands firmly in the doorway, visibly very angry.
Her chin is slightly raised, her brows are drawn together, and her lips are pressed tightly.
She fixes Heady with a stern, sustained stare.
Heady draws his shoulders inward slightly under her gaze.
Keep the performance controlled and tense, without shouting or exaggerated gestures.

SHOT 6 - THE REPRIMAND STOPS

Camera:
Cut to a tighter medium close-up of Supi, maintaining the established doorway position and screen direction.

Action:
Supi parts her lips as if about to reprimand Heady.
Before speaking, her attention catches on something behind him.
Her eyes shift past his shoulder toward the structure inside the apartment.
Her mouth stops mid-intention.
Her expression changes from anger to concentrated curiosity.
Do not show a broad smile or a sudden comic shock.

SHOT 7 - SUPI’S VIEW PAST THE FRONT OF HEADY

Camera:
Place the camera outside the doorway at Supi’s viewing position, looking into the apartment.

Heady stands between the camera and the structure, still facing outward toward Supi and therefore toward the camera.
Show only part of Heady's FRONT-facing face, chest, and shoulder, cropped along the left foreground.
The completed pasta structure is clearly visible behind him, deeper inside the room, standing on the floor in front of the stove.
Keep the structure in sharp focus and Heady's close foreground softly out of focus.

Spatial order:
Camera / Supi's viewpoint → front-facing Heady in the near foreground → pasta structure behind him inside the apartment.

Action:
Heady remains facing Supi throughout the shot.
Only subtle breathing or a small blink.
He does not turn toward the structure.
Hold on the exact approved structure from @Image4.

Do not show the back of Heady's head, rear hair, or back-facing torso.
Do not place the camera behind Heady.
Do not orbit the camera or reverse the viewing direction.
Do not redesign, rebuild, or morph the structure.

SHOT 8 - SUPI'S QUIET AMAZEMENT

Camera:
Cut back to a close-up of Supi at the doorway.

Action:
Supi silently studies what she has discovered.
Her eyes slowly trace the structure from its lower portion toward its top.
The tension in her eyebrows eases, and her lips remain slightly parted.
She is absorbed and momentarily speechless, recognizing the solution the team had struggled to find.
Keep the reaction subtle and sincere.
No broad grin, laughter, dialogue, or wristwatch gesture yet.

MATERIAL AND ENVIRONMENT
The structure consists of dry golden pasta joined with visible small pale cream cheese pieces at its connections.

Preserve the approved geometry and existing arrangement of scattered pasta, cheese, fallen jar, and lid wherever visible.
Keep the structure stable and complete.
Use the floor and kitchen design from @Image3.

STYLE
Handmade matte clay characters, tactile fingerprints, miniature practical-looking props, restrained stepped animation, and consistent warm midday daylight.
No glossy CGI surfaces, rubbery deformation, changing character designs, lighting shifts, or extra cuts.

AUDIO
Quiet interior room tone and subtle natural movement sounds.
No intelligible dialogue, music, new doorbell, ringing phone, captions, subtitles, or watermark.
