A03컷 생성 프롬프트 (모델: Seedance 2.5)

A 13-second clay stop-motion scene in 16:9. Handmade plasticine puppets on a miniature studio-apartment set, photographed frame by frame. Five consecutive shots continue directly after @Video1, in HEADY's apartment kitchen at night.

REFERENCES

@Video1 is the preceding scene. It ends with the linguine spilled across the floor at HEADY's right side, the empty jar and its lid beside it, and THE CAT staring at HEADY from the counter. Continue directly from that moment.

@Image1 is HEADY's character sheet.

@Image2 is THE CAT's character sheet.

@Image3 defines the clay material, surface texture, lighting quality, color grade, and how the spilled linguine looks on the floor.

@Image4 defines HEADY's apartment: room layout, furniture, props, and lighting.

None of @Image1 to @Image4 is a frame of this video. Never open the video on a reference image, never start any shot from one, and never cut to one. The first frame is a brand-new frame that continues from the last moment of @Video1. Never render sheet layouts, labels, or cream backgrounds.

CAST

HEADY

Appearance: @Image1. About three heads tall, with a smooth, rounded, toy-like lavender clay body and a soft, slightly squarish head. Messy plum hair made of thick, twisted, rope-like clay strands, with a yellow pencil tucked into it. A small round lavender clay nose. Two small white front teeth. An orange crossbody satchel.

HEADY's eyes: real physical craft googly eyes made of plastic. Each eye is a round white backing disk with a thin pale rim, covered by a shallow transparent plastic dome, with a separate flat black pupil disk loose inside. The domes catch small, bright specular highlights and clearly read as

glossy plastic, not clay. The pupils can shift slightly inside the domes, like real googly eyes.

HEADY's glasses: round orange clay frames with no lenses. The glossy plastic eye domes sit behind the empty frames and stay clearly distinct from them.

THE CAT

Appearance: @Image2. A plump orange tabby clay cat with the exact same plastic googly-eye construction as HEADY. If anything in this prompt differs from @Image2, follow @Image2.

No other characters.

THE SET

HEADY's apartment exactly as in @Image4 and @Video1: the kitchenette along one wall with the single-burner stove on the left, the small sink, the counter on the right, and the mini fridge beside the counter; the rest of the single room beyond it with the bed, the desk, the drying rack, and the night window. The same warm, neutral, diffused lighting as @Video1, with night shown only through the window.

KEY PROPS

The spilled linguine: whole, flat strands of pale golden clay linguine scattered across the floor at HEADY's right side, looking exactly like @Image3.

The blueprint: a rolled sheet of dusty-blue clay inside HEADY's satchel. When unrolled, it shows the same tower drawing as the office whiteboard, in raised white clay lines: a tall, slender seven-floor tower with a stepped silhouette that narrows twice as it rises, a top floor cantilevering to the right, X-shaped cross-bracing on the lower floors, a small arched entrance at the base, and a thin antenna on the roof.

CAMERA FREEDOM

Where a shot below says "size and angle: your choice," choose the most cinematic shot size and camera angle yourself, following these rules:

keep a consistent 180-degree line and screen direction,

match eyelines across cuts,

vary the shot size between consecutive shots for rhythm, and never repeat the same angle twice in a row,

keep the camera at miniature scale with gentle, motivated moves,

stay consistent with the room layout in @Image4 and with the CONTINUITY LEDGER.

FIXED BLOCKING

THE CAT stays on the counter for this entire video, watching HEADY.

The linguine, the jar, and its lid stay where they fell, except for the strands HEADY picks up.

Once the satchel is thrown, it stays where it lands.

CONTINUITY LEDGER — CARRY EVERY STATE ACROSS EVERY CUT

Before each cut, remember exactly where each character is, which way they face, what their hands hold, and the state of every prop. Each new shot begins in exactly the state the previous shot ended in. Nothing resets, jumps, or swaps.

Start of Shot 1: exactly the end of @Video1. HEADY stands in front of the stove, the pot simmering on the lit burner, the linguine spilled at his right side, the satchel on his shoulder.

Start of Shot 2: the burner is off. HEADY crouches beside the spilled linguine with a few strands in his hand.

Start of Shot 3: HEADY kneels beside the linguine without his satchel. The satchel lies on the floor a short distance away, toward the room.

Start of Shot 4: the blueprint has rolled out of the satchel and lies unrolled flat on the floor between the satchel and the linguine.

Start of Shot 5: HEADY kneels beside the linguine and the blueprint, looking from one to the other.

End of Shot 5: same positions. HEADY is intrigued.

FLOW AND PACING

Keep the total duration at 13 seconds. Let the shot lengths follow the actions naturally.

Shot 1 — full shot:

HEADY reaches over and turns off the stove, then crouches beside the spilled linguine and starts picking up the strands one by one, gathering them in his hand. A few slip out of his fingers and drop back to the floor. He picks them up again.

Shot 2 — size and angle: your choice:

Another bundle slips and scatters. HEADY's patience snaps in a small, comic way: he huffs, yanks the orange satchel off over his head, and flings it aside onto the floor. It lands with a soft thump. The frustration is brief and restrained, not violent.

Shot 3 — size and angle: your choice:

The flung satchel's flap falls open. The rolled blueprint tumbles out, rolls across the floor, and unrolls flat, revealing the tower drawing.

Shot 4 — HEADY's point of view, looking down:

The unrolled blueprint fills the view. Then HEADY's gaze slides from the blueprint to the scattered linguine beside it. In a soft, in-camera double exposure, the tower's white lines float over the scattered strands, and several linguine strands line up with the tower's lines, as if the mess on the floor were drawing the same building, and even filling in the places where the tower was weak.

Shot 5 — size and angle: your choice, close enough to read his face:

HEADY's face, intrigued. His pupils dart between the blueprint and the linguine inside his plastic

eye domes, his brows lift slightly, and a small, curious smile begins to form.

AUDIO

No music.

Shot 1: the click of the stove knob, the flame dying out, the faint dry clicks of linguine being picked up.

Shot 2: a small huff, then the soft thump of the satchel hitting the floor.

Shot 3: the rustle of the blueprint rolling out and flattening.

Shot 4: the room falls quiet, and delicate, mysterious tones fade in, like those in the earlier pencil-pavilion daydream.

Shot 5: the delicate tones linger softly.

LOOK — MATCH THE EARLIER SCENES

The entire video must look like photographed frames from a real handcrafted clay stop-motion miniature set, not polished CGI, matching @Video1 and @Image3.

Strong handmade clay tactility, clearly visible on characters, furniture, walls, floor, and props: strong fingerprint ridges, thumb-pressed dents, finger pressure marks, sculpting-tool grooves, small scrape marks, joined clay seams, compressed edges, slight smearing, uneven hand-shaped surfaces, tiny lumps, soft deformation, imperfect geometry. Do not stylize the clay too cleanly.

Every effect is practical, as a real stop-motion crew would make it.

Lighting: warm neutral diffused light, gentle fill, soft shadows, moderate contrast, creamy highlights.

Color palette: cream beige, earthy brown, muted lavender, muted plum, soft ochre, muted green, restrained saturation, with the orange of the cat and the satchel kept soft and muted.

Camera: cinematic miniature photography with natural lens perspective, selective depth of field, soft optical falloff, realistic miniature-scale lighting, and subtle macro-photography characteristics.

Motion: subtle frame-by-frame puppet acting and smooth camera movement.

Mood: cozy, innocent, slightly dopey, quietly funny, empathetic, understated.

No polished CGI, no glossy 3D-render look, no perfectly smooth clay, no extra characters, no extra limbs, no reference-sheet layouts, no captions, no speech bubbles, no logos, and no watermarks.
