B01 컷 생성 프롬프트 (모델: Seedance 2.5)

A 13-second clay stop-motion scene in 16:9. Handmade plasticine puppets on a miniature studio-apartment set, photographed frame by frame. Five consecutive shots continue directly after @Video1.

This continues the busy, funny, slightly chaotic work montage. HEADY and THE CAT become an odd little team, but what HEADY is building is never revealed.

REFERENCES

@Video1 is the preceding scene. It ends with HEADY sitting cross-legged on the floor, busy with his work, and THE CAT sitting on the floor at his right side beside the cheese block, peering at him. Continue directly from that moment.

@Image1 is HEADY's character sheet.

@Image2 is THE CAT's character sheet.

@Image3 defines the clay material, surface texture, lighting quality, color grade, and how the linguine looks.

@Image4 defines HEADY's apartment: room layout, furniture, props, and lighting.

None of @Image1 to @Image4 is a frame of this video. Never open the video on a reference image, never start any shot from one, and never cut to one. The first frame is a brand-new frame that continues from the last moment of @Video1. Never render sheet layouts, labels, or cream backgrounds.

CAST

HEADY

Appearance: @Image1. About three heads tall, with a smooth, rounded, toy-like lavender clay body and a soft, slightly squarish head. Messy plum hair made of thick, twisted, rope-like clay strands, with a yellow pencil tucked into it. A small round lavender clay nose. Two small white front teeth.

HEADY's eyes: real physical craft googly eyes made of plastic. Each eye is a round white backing disk with a thin pale rim, covered by a shallow transparent plastic dome, with a separate flat black pupil disk loose inside. The domes catch small, bright specular highlights and clearly read as glossy plastic, not clay. The pupils can shift slightly inside the domes, like real googly eyes.

HEADY's glasses: round orange clay frames with no lenses. The glossy plastic eye domes sit behind the empty frames and stay clearly distinct from them.

THE CAT

Appearance: @Image2. A plump orange tabby clay cat with the exact same plastic googly-eye construction as HEADY. If anything in this prompt differs from @Image2, follow @Image2.

Mood: calm and matter-of-fact, with its usual blank, innocent stare in every shot. Its eyes never turn sparkly, teary, or starry.

No other characters.

THE SET

HEADY's apartment exactly as in @Image4 and @Video1. The same warm, neutral, diffused lighting as @Video1, with night shown only through the window.

KEY PROPS

The cheese block: soft, pale-yellow clay cheese on the floor between HEADY and THE CAT.

The blueprint: the dusty-blue clay sheet with the stepped tower drawing, lying flat on the floor at HEADY's left.

Loose linguine: whole, flat strands of pale golden clay linguine, looking exactly like @Image3.

Whatever HEADY builds from linguine and cheese is THE SECRET WORK.

THE SECRET WORK — NEVER REVEALED

THE SECRET WORK must never be shown as a whole, in any shot, from any angle. Its size, height, and shape stay a complete mystery.

Only tiny fragments may appear, and only in tight close-ups: a single cheese joint, two strands being pressed together, the tip of a strand poking up at the very bottom edge of the frame, or a soft, out-of-focus bit at the very edge of the frame.

Keep it hidden by framing above it or tight on hands, paws, and faces, behind HEADY's own body, behind THE CAT, the blueprint, or foreground props, or with very shallow depth of field.

No wide shot or full shot ever includes it.

COMEDY & ENERGY

The rhythm is quick and bustling, with snappy cuts.

THE CAT tears cheese a little too eagerly, ending up with cheese crumbs on its whiskers. HEADY is still in his happy frenzy, with a strand in his teeth and sticky fingers. Now and then a linguine bit pings off and flies out of frame, and THE CAT's eyes follow it.

The humor stays gentle and deadpan, never frantic or exaggerated.

CAMERA FREEDOM

Where a shot below says "size and angle: your choice," choose the most cinematic shot size and camera angle yourself, following these rules:

always keep THE SECRET WORK hidden,

keep a consistent 180-degree line and screen direction,

match eyelines across cuts,

vary the shot size between consecutive shots for rhythm, and never repeat the same angle twice in a row,

keep the camera at miniature scale with gentle, motivated moves,

stay consistent with the room layout in @Image4 and with the CONTINUITY LEDGER.

FIXED BLOCKING

HEADY sits cross-legged on the floor facing his work, with the blueprint on his left and the cheese block on his right.

THE CAT sits on the floor at HEADY's right side, beside the cheese block.

Screen direction: in every shot inside the apartment, HEADY is on image left and THE CAT is on image right.

CONTINUITY LEDGER — CARRY EVERY STATE ACROSS EVERY CUT

Before each cut, remember exactly where each character is, which way they face, what their hands or paws hold, and the state of every prop. Each new shot begins in exactly the state the previous shot ended in. Nothing resets, jumps, or swaps.

Start of Shot 11: exactly the end of @Video1.

Start of Shot 12: THE CAT holds out a small piece of cheese toward HEADY. HEADY has just turned toward it.

Start of Shot 13: the same moment, from the reverse angle.

Start of Shot 14: the same positions. THE CAT still holds out the cheese.

End of Shot 14: HEADY has taken the cheese and is back at work. THE CAT sits beside him. THE SECRET WORK is still hidden.

Shot 15 takes place outside the building and shows time passing.

FLOW AND PACING

Keep the total duration at 13 seconds. Let the shot lengths follow the actions naturally.

Shot 11 — size and angle: your choice, tight on THE CAT and the cheese block:

THE CAT eyes the cheese block, then tears off a small piece with its front paws, a little too eagerly, leaving crumbs on its whiskers. It holds the piece out toward HEADY.

Shot 12 — over THE CAT's shoulder onto HEADY:

THE CAT's round orange back and one ear fill the soft-focus foreground on image right. HEADY, on image left in sharp focus and framed from the chest up, turns from his work to find the cat offering him cheese, a linguine strand still in his teeth. His expression is flustered but amused: brows up, a startled little laugh that makes the strand bob, a crooked half-smile, and his pupils wobbling in his plastic eye domes.

Shot 13 — over HEADY's shoulder onto THE CAT:

HEADY's shoulder and the edge of his plum hair fill the soft-focus foreground on image left. THE CAT, on image right in sharp focus, looks up at him with its usual blank, matter-of-fact stare, cheese crumbs on its whiskers, holding the piece of cheese up without the slightest change of expression, as if this were perfectly normal.

Shot 14 — size and angle: your choice, tight on HEADY and THE CAT, with THE SECRET WORK below the frame or behind HEADY's body:

HEADY takes the cheese from THE CAT, gives it a quick grateful nod, and dives straight back into his work with renewed energy. A linguine bit pings off and flies past, and THE CAT's eyes follow it. THE CAT settles beside him, now a matter-of-fact little assistant, watching every move.

Shot 15 — exterior time-lapse, about 3 seconds:

Outside HEADY's apartment building at night: a small, slightly worn clay miniature residential building, HEADY's window glowing warmly. In a stop-motion time-lapse, the sky shifts from deep night blue to a pale pink dawn to bright morning. The neighbors' windows go dark one by one while HEADY's window stays lit the whole time. Cotton-wool clouds drift across the sky, and morning sunlight sweeps across the facade. Nothing inside the window is visible.

AUDIO

No music.

Shot 11: an eager, tearing squish of cheese and a tiny "mrrp" from THE CAT.

Shot 12: a small, startled laugh from HEADY, muffled by the strand in his teeth.

Shot 13: a single, flat little meow.

Shot 14: busy building sounds resume, with a tiny ping of a flying linguine bit.

Shot 15: night ambience with a faint distant city hum, gradually giving way to early morning birdsong.

LOOK — MATCH THE EARLIER SCENES

The entire video must look like photographed frames from a real handcrafted clay stop-motion miniature set, not polished CGI, matching @Video1 and @Image3.

Strong handmade clay tactility, clearly visible on characters, furniture, walls, floor, props, every linguine strand, and the exterior building: strong fingerprint ridges, thumb-pressed dents, finger pressure marks, sculpting-tool grooves, small scrape marks, joined clay seams, compressed edges, slight smearing, uneven hand-shaped surfaces, tiny lumps, soft deformation, imperfect geometry. Do not stylize the clay too cleanly.

Every effect is practical, as a real stop-motion crew would make it. The time-lapse is made with changing practical lights, painted sky panels, and cotton-wool clouds, not CGI.

Lighting: warm neutral diffused light, gentle fill, soft shadows, moderate contrast, creamy highlights.

Color palette: cream beige, earthy brown, muted lavender, muted plum, soft ochre, muted green, restrained saturation, with the orange of the cat kept soft and muted.

Camera: cinematic miniature photography with natural lens perspective, selective depth of field, soft optical falloff, realistic miniature-scale lighting, and subtle macro-photography characteristics.

Motion: subtle frame-by-frame puppet acting and smooth camera movement.

Mood: cozy, innocent, slightly dopey, quietly funny, busy, understated.

No full view of THE SECRET WORK, no wide shot of it, no finished structure, no sparkly or starry cat eyes, no polished CGI, no glossy 3D-render look, no perfectly smooth clay, no extra characters, no extra limbs, no reference-sheet layouts, no captions, no speech bubbles, no logos, and no watermarks.
