A01-02컷 생성 프롬프트 (모델: Seedance 2.5)

A 15-second clay stop-motion scene in 16:9. Handmade plasticine puppets on a miniature studio-apartment set, photographed frame by frame. Five consecutive shots continue directly after @Video1, in HEADY's apartment at night.

This is a busy, funny, slightly chaotic work montage. HEADY is suddenly and intensely occupied with something, but what he is building is never revealed.

REFERENCES

@Video1 is the preceding scene. It ends with HEADY kneeling on the floor beside the spilled linguine and the unrolled blueprint, intrigued, with his satchel lying nearby and THE CAT watching from the counter. Continue directly from that moment.

@Image1 is HEADY's character sheet.

@Image2 is THE CAT's character sheet.

@Image3 defines the clay material, surface texture, lighting quality, color grade, and how the linguine looks.

@Image4 defines HEADY's apartment: room layout, furniture, props, and lighting.

None of @Image1 to @Image4 is a frame of this video. Never open the video on a reference image, never start any shot from one, and never cut to one. The first frame is a brand-new frame that continues from the last moment of @Video1. Never render sheet layouts, labels, or cream backgrounds.

CAST

HEADY

Appearance: @Image1. About three heads tall, with a smooth, rounded, toy-like lavender clay body and a soft, slightly squarish head. Messy plum hair made of thick, twisted, rope-like clay strands, with a yellow pencil tucked into it. A small round lavender clay nose. Two small white front teeth. His orange satchel lies on the floor where he threw it.

HEADY's eyes: real physical craft googly eyes made of plastic. Each eye is a round white backing disk with a thin pale rim, covered by a shallow transparent plastic dome, with a separate flat black pupil disk loose inside. The domes catch small, bright specular highlights and clearly read as glossy plastic, not clay. The pupils can shift slightly inside the domes, like real googly eyes.

HEADY's glasses: round orange clay frames with no lenses. The glossy plastic eye domes sit behind the empty frames and stay clearly distinct from them.

THE CAT

Appearance: @Image2. A plump orange tabby clay cat with the exact same plastic googly-eye construction as HEADY. If anything in this prompt differs from @Image2, follow @Image2.

No other characters.

THE SET

HEADY's apartment exactly as in @Image4 and @Video1, with the burner off and the pot resting on the stove. The same warm, neutral, diffused lighting as @Video1, with night shown only through the window.

KEY PROPS

The linguine: whole, flat strands of pale golden clay linguine, looking exactly like @Image3.

The blueprint: the unrolled dusty-blue clay sheet with the stepped tower drawing, lying flat on the floor.

The cheese: one block of soft, pale-yellow clay cheese from the mini fridge. Small pieces can be pinched or torn off it.

Whatever HEADY builds from linguine and cheese is THE SECRET WORK.

THE SECRET WORK — NEVER REVEALED

THE SECRET WORK must never be shown as a whole, in any shot, from any angle. Its size, height, and shape stay a complete mystery.

Only tiny fragments may appear, and only in tight close-ups: a single cheese joint, two strands being pressed together, the tip of a strand poking up at the very bottom edge of the frame, or a soft, out-of-focus bit at the very edge of the frame.

Keep it hidden by framing above it or tight on hands and faces, behind HEADY's own body, behind THE CAT, the blueprint, or foreground props, or with very shallow depth of field.

No wide shot or full shot ever includes it.

COMEDY & ENERGY

The rhythm is quick and bustling, with snappy cuts.

HEADY works in a happy frenzy: strands clutched in both hands, one strand held between his two front teeth, the yellow pencil pulled from his hair as a quick measuring stick and stuck back in, sticky cheese on his fingers that he tries to shake off, a stray strand clinging to his glasses. Now and then a linguine bit pings off and flies out of frame.

The humor stays gentle and deadpan, never frantic or exaggerated.

CAMERA FREEDOM

Where a shot below says "size and angle: your choice," choose the most cinematic shot size and camera angle yourself, following these rules:

always keep THE SECRET WORK hidden,

keep a consistent 180-degree line and screen direction,

match eyelines across cuts,

vary the shot size between consecutive shots for rhythm, and never repeat the same angle twice in a row,

keep the camera at miniature scale with gentle, motivated moves,

stay consistent with the room layout in @Image4 and with the CONTINUITY LEDGER.

FIXED BLOCKING

From Shot 7 onward, HEADY sits cross-legged on the floor where the linguine spilled, facing his work, with the blueprint on his left and the cheese block on his right.

THE CAT stays on the counter until Shot 10, when it hops down and sits on the floor at HEADY's right side.

The satchel stays where it was thrown.

CONTINUITY LEDGER — CARRY EVERY STATE ACROSS EVERY CUT

Before each cut, remember exactly where each character is, which way they face, what their hands hold, and the state of every prop. Each new shot begins in exactly the state the previous shot ended in. Nothing resets, jumps, or swaps.

Start of Shot 6: HEADY has stepped from the linguine to the mini fridge beside the counter and opens its door.

Start of Shot 7: HEADY sits cross-legged on the floor, the cheese block on his right, the blueprint on his left.

Start of Shot 8: the first cheese joint holds.

Start of Shot 9: HEADY is deep in his work. THE SECRET WORK stays out of frame.

Start of Shot 10: same positions. HEADY is still working.

End of Shot 10: HEADY is still busy. THE CAT sits on the floor at HEADY's right side, beside the cheese block, peering at him. THE SECRET WORK is still hidden.

FLOW AND PACING

Keep the total duration at 15 seconds. Let the shot lengths follow the actions naturally.

Shot 6 — refrigerator point of view, camera inside the fridge:

The camera sits inside the mini fridge, looking out past shelves of clay groceries. The door swings open, and warm fridge light spills onto HEADY's face. He peers in with an excited, sparkling expression, his pupils wide in his plastic eye domes. He reaches toward the camera and grabs the block of cheese from the shelf in the foreground.

Shot 7 — extreme close-up on HEADY's hands:

Only his hands and two linguine strands are in frame. He pinches off a small piece of cheese, presses it where the two strands cross, and squeezes. He lets go. The joint holds. He gives it a tiny, careful wiggle, and it still holds.

Shot 8 — size and angle: your choice, framed so THE SECRET WORK stays hidden:

HEADY works in a happy frenzy, seen from the chest up with his work below the frame. He grabs strands, glances at the blueprint, holds one strand in his teeth while his hands fit two others together, pulls the pencil from his hair to measure something, then sticks it back in. He shakes sticky cheese off his fingers.

Shot 9 — close-up:

HEADY's face, lit up with excitement. Big bright highlights on his plastic eye domes, a wide grin showing his two front teeth, his glasses slightly askew, a stray strand of linguine stuck to one lens frame, and a crumb of cheese on his cheek. He doesn't notice any of it.

Shot 10 — size and angle: your choice, clearly different from Shot 8, with THE SECRET WORK hidden behind HEADY's body:

HEADY keeps working, elbows busy, a linguine bit pinging off and flying out of frame. In the background, THE CAT hops down from the counter, pads across the floor, and sits at HEADY's right side, tilting its head and peering curiously at whatever he is doing.

AUDIO

No music.

Shot 6: the suction pop of the fridge door, the soft hum of the fridge, a small excited intake of

breath.

Shot 7: a soft squish of cheese and a faint click of linguine.

Shot 8: rapid little clicks of linguine and squishes of cheese, and HEADY humming happily under his breath, muffled by the strand in his teeth.

Shot 9: a small, delighted giggle.

Shot 10: busy building sounds, a tiny ping of a flying linguine bit, and the soft patter of the cat's paws landing on the floor.

LOOK — MATCH THE EARLIER SCENES

The entire video must look like photographed frames from a real handcrafted clay stop-motion miniature set, not polished CGI, matching @Video1 and @Image3.

Strong handmade clay tactility, clearly visible on characters, furniture, walls, floor, props, and every linguine strand: strong fingerprint ridges, thumb-pressed dents, finger pressure marks, sculpting-tool grooves, small scrape marks, joined clay seams, compressed edges, slight smearing, uneven hand-shaped surfaces, tiny lumps, soft deformation, imperfect geometry. Do not stylize the clay too cleanly.

Every effect is practical, as a real stop-motion crew would make it. The fridge light is a warm practical bulb.

Lighting: warm neutral diffused light, gentle fill, soft shadows, moderate contrast, creamy highlights.

Color palette: cream beige, earthy brown, muted lavender, muted plum, soft ochre, muted green, restrained saturation, with the orange of the cat and the satchel kept soft and muted.

Camera: cinematic miniature photography with natural lens perspective, selective depth of field, soft optical falloff, realistic miniature-scale lighting, and subtle macro-photography characteristics.

Motion: subtle frame-by-frame puppet acting and smooth camera movement.

Mood: cozy, innocent, slightly dopey, quietly funny, busy, understated.

No full view of THE SECRET WORK, no wide shot of it, no finished structure, no polished CGI, no glossy 3D-render look, no perfectly smooth clay, no extra characters, no extra limbs, no reference-sheet layouts, no captions, no speech bubbles, no logos, and no watermarks.
